**References**

**Executive summary.** Nawah Digital ("Nawah" — نواة, meaning *nucleus* or *seed*) is a digital marketing agency designed to serve small and medium businesses outside Egypt's major metropolitan hubs, starting with the Delta region. The graduation project covers the full launch of the agency as a real, operating brand: market research, brand identity, owned digital assets (website and social channels), a launch campaign across organic and paid media, a lead-capture and reporting system, and a measured pilot engagement with a real local client. Every deliverable is tied to a measurable KPI so the project can prove results, not just produce content.

# 1. Project Planning & Management

## 1.1 Project Overview & Problem Statement

Egypt has one of the largest online audiences in the region, yet most small businesses still market online in an ad-hoc way: occasional posts, "boosted" posts without targeting, and no tracking of what actually produces sales. Established agencies are concentrated in Greater Cairo and are typically priced and structured for larger brands, while freelancers often deliver isolated tasks (a design, a post) rather than a strategy tied to business results.

**Problem statement:** Small and medium businesses in the Delta region lack an affordable, strategy-led, and measurable digital marketing partner that understands their local audience and can show a clear return on every pound spent.

**Proposed solution:** Launch **Nawah Digital**, a lean agency offering packaged, results-tracked services — social media management, content creation, paid advertising, basic SEO/local search, and monthly performance reporting — and validate the model through the agency's own launch campaign plus a pilot with a real client.

## 1.2 Objectives (SMART)

| # | Objective | Measure | Deadline |
|---|---|---|---|
| O1 | Define the agency's market, positioning, service packages and pricing based on primary and secondary research. | Approved strategy document + 3 service packages | Week 3 |
| O2 | Build a complete brand identity and owned channels (website/landing page, Facebook, Instagram, TikTok, Google Business Profile). | All channels live and brand-consistent | Week 4 |
| O3 | Run a 4-week integrated launch campaign (organic + paid) for the agency itself. | KPI targets in §1.8 | Week 8 |
| O4 | Deliver a 4-week pilot for one real local SME client and report measurable results. | Pilot report with before/after metrics | Week 8 |
| O5 | Present a final, evidence-based case study and business plan to the DEPI jury. | Final documentation + presentation | Week 9 |

## 1.3 Scope

### In scope

- Market research, competitor and audience analysis
- Agency brand identity (name, logo, palette, tone of voice, brand guidelines)
- Bilingual (Arabic/English) landing page with lead form and tracking (Meta Pixel, GA4)
- Social channels setup and a 30-day content calendar
- Paid campaigns on Meta (Facebook/Instagram) and TikTok with a capped test budget
- Basic on-page and local SEO (Google Business Profile)
- Lead management (CRM sheet/tool) and a KPI reporting dashboard
- One pilot client engagement with a results report

### Out of scope

- Custom software or mobile-app development
- TV, radio, outdoor or print media buying
- Large-scale paid budgets beyond the approved test budget
- E-commerce store build for clients
- Legal registration of the company (documented as a next step only)
- Managing more than one pilot client during the project period

## 1.4 Key Deliverables

| ID | Deliverable | Owner (role) |
|---|---|---|
| D1 | Project documentation Part I (this document) | Project Manager |
| D2 | Market & competitor research report, audience personas | Market Research Lead |
| D3 | Brand guidelines (logo, colors, typography, tone of voice) | Brand & Content Lead |
| D4 | Landing page + tracking setup (Pixel, GA4, UTM convention) | SEO & Analytics Lead |
| D5 | 30-day content calendar and creative assets (posts, reels, stories) | Brand & Content Lead |
| D6 | Media plan and live paid campaigns (Meta, TikTok) | Performance Marketing Lead |
| D7 | Lead tracker / CRM and KPI dashboard | SEO & Analytics Lead |
| D8 | Pilot client report (baseline vs. results) | Project Manager + all |
| D9 | Final documentation, case study and jury presentation | All members |

## 1.5 Project Timeline

Planned window: 12 October – 13 December 2026 (9 weeks). Dates will be aligned with the official DEPI milestones as they are announced.

★ = milestone: W2 — documentation Part I submitted (19 Oct 2026); W9 — final delivery and presentation.

## 1.6 Team Roles & Responsibilities

| Role | Member | Key responsibilities |
|---|---|---|
| **Project Manager / Team Leader** | Mahmoud Hussien Mohamed Hussien | Planning, task tracking, client communication, risk log, LMS/GitHub submissions, final integration of deliverables. |
| **Market Research Lead** | Asmaa Saeed Ahmed El-Zankaly | Secondary research, competitor benchmarking, surveys and interviews, personas, pricing research. |
| **Brand & Content Lead** | Aya Saeed Abdelfattah Hodairy | Brand identity, tone of voice, copywriting, content calendar, design and short-video production. |
| **Performance Marketing Lead** | Hamdy Ali Mohamed Ali | Media plan, audience targeting, Meta and TikTok campaigns, A/B tests, budget pacing. |
| **SEO & Analytics Lead** | Yasmin Omar Mohamed Mohamed | Landing page, SEO and Google Business Profile, Pixel/GA4/UTMs, CRM, dashboards and reports. |
| **Social Media & Community Lead** | Mazen Kamel Awad Abo El-Reesh | Publishing schedule, community management, comment and message replies, WhatsApp lead follow-up, response-time tracking. |

## RACI matrix

R = Responsible · A = Accountable · C = Consulted · I = Informed

| Deliverable | PM | Research | Brand & Content | Performance | SEO & Analytics | Social & Community |
|---|---|---|---|---|---|---|
| Documentation Part I | A/R | R | C | C | R | C |
| Market research & personas | A | R | C | C | I | C |
| Brand identity | A | C | R | I | I | C |
| Landing page & tracking | A | I | C | C | R | I |
| Content calendar & creatives | A | C | R | C | I | R |
| Paid campaigns | A | I | C | R | C | C |
| Dashboard & reporting | A | I | I | C | R | C |
| Pilot client engagement | A/R | C | R | R | R | R |
| Final presentation | A/R | R | R | R | R | R |

## 1.7 Risk Management

| # | Risk | Prob. | Impact | Mitigation / response |
|---|---|---|---|---|
| R1 | Ad account restricted or ads rejected by platform policy | Med | High | Verify Business Manager early, follow Meta/TikTok ad policies, avoid restricted claims, keep a backup ad account and organic plan. |
| R2 | Limited ad budget produces too little data to optimize | High | Med | Concentrate budget on 1–2 platforms and one objective (leads), test few variables at a time, combine with organic reach. |
| R3 | Pilot client delays approvals or withdraws | Med | High | Sign a simple scope agreement, agree a 48-hour approval window, keep a back-up pilot candidate shortlisted. |
| R4 | Team member unavailability (work/study conflicts) | Med | Med | Shared task board, documented work in GitHub, every role has a named backup member. |
| R5 | Inconsistent brand voice across members' content | Med | Low | Brand guidelines and templates first; single reviewer approves all content before publishing. |
| R6 | Tracking errors (Pixel/GA4) corrupt results | Med | High | Test events before launch, UTM naming convention, weekly data-quality check. |
| R7 | Negative comments or reputational issues on launch | Low | Med | Community management guide, response templates, 24-hour response rule. |
| R8 | Scope creep (extra client requests) | Med | Med | Written scope (§1.3), change requests logged and approved by the PM only. |
| R9 | Handling customer personal data from leads | Low | High | Collect minimum data, restricted access, consent notice on forms, comply with Egypt's Personal Data Protection Law No. 151/2020. |

## 1.8 Success Metrics (KPIs)

Targets are for the 4-week launch period and will be re-baselined after week 1 of live data.

| Area | KPI | Target | Source |
|---|---|---|---|
| Awareness | Total reach (organic + paid) | ≥ 100,000 unique accounts | Meta / TikTok insights |
| Audience growth | New followers across channels | ≥ 1,000 | Platform insights |
| Engagement | Average engagement rate per post | ≥ 3% | Platform insights |
| Traffic | Landing-page sessions | ≥ 1,500 sessions | GA4 |
| Conversion | Qualified leads (form + WhatsApp) | ≥ 50 leads | CRM tracker |
| Efficiency | Cost per lead (CPL) | ≤ EGP 40 | Ads Manager + CRM |
| Sales | Discovery calls booked / clients signed | ≥ 10 calls / ≥ 2 clients | CRM tracker |
| Service | Median first response time to leads | ≤ 1 hour (working hours) | CRM tracker |
| Pilot client | Improvement vs. baseline (reach, messages, engagement) | ≥ 30% uplift on primary metric | Client page insights |
| Project | Milestones delivered on time | 100% | Task board |

## 1.9 Tools & Collaboration

| Purpose | Tools |
|---|---|
| Project management | Trello / Notion board, Google Calendar, weekly stand-up (Google Meet) |
| Documentation & version control | GitHub (single team repository), Google Drive |
| Design & video | Canva, Adobe Express, CapCut |
| Publishing & ads | Meta Business Suite, Meta Ads Manager, TikTok Ads Manager |
| Website & SEO | Landing-page builder (e.g., WordPress/Carrd), Google Search Console, Google Business Profile |
| Analytics & reporting | GA4, Meta Pixel, UTM builder, Looker Studio dashboard |
| Lead management | Google Sheets CRM or HubSpot Free CRM, WhatsApp Business |

# 2. Literature Review

## 2.1 Market Context

The Egyptian digital audience is large and still growing, which makes online channels the most cost-effective route to customers for small businesses:

| Indicator (late 2025) | Value |
|---|---|
| Internet users / penetration | 98.2 million / 82.7% |
| Social media user identities | 51.6 million (43.4% of population) |
| Facebook ad reach | 51.6 million (68.8% of adults 18+) |
| YouTube ad reach | 49.3 million |
| TikTok ad reach (18+) | 48.8 million (+25.2% in one year) |
| Messenger ad reach | 37.0 million |
| Instagram ad reach | 21.7 million (+13.9% in one year) |
| Snapchat ad reach | 20.6 million |
| Rural share of population | 56.5% |
| Median age | 24.5 years |

Source: DataReportal, *Digital 2026: Egypt* (Kepios / We Are Social / Meltwater, Nov 2025) [1].

**Implications for Nawah:** Facebook remains the backbone channel for reaching Egyptian adults, TikTok is the fastest-growing paid channel, and the majority of the population lives outside urban centres — supporting a regional focus on the Delta rather than competing head-to-head in Cairo.

## 2.2 Academic Perspective

- **Adoption is driven by perceived usefulness and owner capability.** Research on e-marketing by small businesses in Egypt and the UK found adoption depends on perceived advantage, ease of use, owner skills, resources and culture, and that adoption has a strong positive effect on marketing performance [4].
- **Egyptian SMEs often apply digital marketing partially.** A study of Egyptian small enterprises reported that activities were narrow and partial, and that many owners did not perceive a positive impact on performance [5] — pointing to a need for strategy and measurement, not just presence.
- **MSMEs need practical, flexible frameworks.** A grounded-theory study observing 10 Egyptian MSMEs over nine months proposed a dynamic adoption model linking digital tools (mainly Facebook and Instagram) to outcomes such as sales growth and customer engagement [3].

- **Measurement is the industry's weak point.** An industry survey of 312 Egyptian business leaders found digital marketing efforts were largely not data-driven and CRM usage was limited to about half of organizations [6].

> **Takeaway:** The barrier for SMEs is not access to platforms — it is know-how, consistency and proof of return. Nawah's model therefore centres on packaged strategy, simple reporting, and education for the business owner.

## 2.3 Similar Solutions Reviewed

We reviewed four categories of alternatives that an Egyptian SME can use today to market online.

### A. Established Cairo-based agencies

- **Social Media Egypt (SME)** — one of the most established agencies, specializing in social campaigns, digital strategy and community management [7].
- **Digital Brandria** — Cairo-based agency founded in 2017, offering SEO, PPC, social, content and email marketing; lists Google Premier Partner and Facebook Marketing Partner status [8].
- **MG Digital** — focuses on social-media advertising, emphasizing integration and automation of the ad process [9].
- **Dot IT** — a full-service agency operating since 2003 [7][10].

### B. Freelancers via marketplaces

Platforms such as Khamsat, Mostaql, Upwork and local Facebook groups give SMEs access to individual designers, content writers and media buyers on a per-task basis.

### C. Do-it-yourself tools

Owners manage their own pages using Meta Business Suite, the "Boost post" button, Canva templates and CapCut — free or low-cost, but dependent on the owner's time and skills.

### D. In-house marketing hire

Hiring a full-time marketing specialist or "moderator" — common in growing SMEs but a fixed monthly cost with a single person's skill set.

## 2.4 Comparative Analysis

| Criteria | Large agencies (A) | Freelancers (B) | DIY tools (C) | In-house hire (D) | Nawah Digital |
|---|---|---|---|---|---|
| **Cost for an SME** | High | Low–medium | Very low | Medium, fixed | **Low–medium, tiered packages** |
| **Strategy & planning** | Strong | Usually task-only | None | Depends on person | **Included in every package** |
| **Range of skills** | Full team | Single skill | Owner only | One person | **Small multi-skill team (6)** |
| **Measurement & reporting** | Strong | Rare | Platform insights only | Varies | **Monthly KPI dashboard** |
| **Local / regional understanding** | Cairo-focused | Varies | High (owner) | High | **Delta-focused, local dialect content** |
| **Accessibility for small budgets** | Low (minimum retainers) | High | High | Medium | **High (starter package)** |
| **Continuity & accountability** | High | Low | Low | Medium | **Contracted scope + SLA** |
| **Main weakness** | Price; SMEs are low priority | Inconsistent quality, no strategy | Time-consuming, no expertise | Cost, turnover risk | New brand, no track record yet |

## 2.5 Identified Gap & Positioning

> **Gap:** An SME in the Delta can choose either *expensive and strategic* (large agencies) or *affordable but fragmented* (freelancers and DIY). There is little in between that combines strategy, execution and clear reporting at a price small businesses accept.
>
> **Positioning statement:** For small and medium businesses in the Delta region that want real customers from social media, Nawah Digital is the local digital marketing partner that turns a modest budget into measurable results — because every package includes strategy, content, ads and a simple monthly report the owner can understand.

## 2.6 Lessons Applied from the Review

- **From large agencies:** adopt structured processes — briefs, content approval, monthly reporting and platform partner standards.
- **From freelancers:** keep pricing simple and modular so a small business can start small.
- **From DIY tools:** use the same accessible tools (Canva, Meta Business Suite) so clients can understand the work, and include light owner training.

- **From academic findings:** address the real barriers — owner know-how and proof of ROI — through education content and transparent KPIs.
- **Risk noted:** a new agency has no portfolio; the pilot client case study is designed specifically to close this gap.

# 3. Requirements Gathering

## 3.1 Stakeholders

| Stakeholder | Type | Needs & expectations |
|---|---|---|
| **SME owners (target clients)** | Primary | More customers and sales, affordable pricing, simple reporting, fast communication, content in local dialect. |
| **Clients' end customers** | Secondary | Relevant, trustworthy content; quick replies to messages; clear offers and prices. |
| **Pilot client** | Primary | Measurable improvement in reach and enquiries within 4 weeks with minimal effort on their side. |
| **Nawah project team** | Internal | Clear roles, shared tools, templates and a manageable workload. |
| **DEPI / CLS instructors & jury** | Evaluators | Complete documentation, application of track skills, measurable outcomes, on-time submission. |
| **Ad platforms (Meta, TikTok, Google)** | External | Compliance with advertising and data policies. |

## 3.2 Target Personas

**Hassan, 38 — Retail shop owner**
Mobile-accessories shop in a Delta town. Posts on Facebook occasionally and boosts posts without targeting.
*Goal:* more walk-ins and WhatsApp orders.
*Pain:* "I paid for boosts and saw no sales."
*Needs:* a monthly plan, local-dialect content, clear cost per order.

**Dr. Mona, 34 — Clinic owner**
Runs a private dental clinic; relies on referrals.
*Goal:* steady bookings for new patients.
*Pain:* no time to manage pages; unsure what is allowed in medical ads.
*Needs:* professional, compliant content and booking-focused campaigns.

**Youssef, 27 — Online seller**
Sells clothing through Instagram and Facebook with delivery.
*Goal:* lower cost per order and repeat customers.
*Pain:* rising ad costs; cannot tell which ads work.
*Needs:* testing, tracking, retargeting and simple reports.

## 3.3 Elicitation Methods

- **Online survey** (Google Forms) — target ≥ 40 SME owners in the Delta on current marketing practice, budgets and pain points.
- **Semi-structured interviews** — 5–8 business owners, including the pilot client, to validate needs and pricing.
- **Competitor benchmarking** — review of agency websites, packages, and social pages (Section 2).
- **Social listening** — analysis of comments and questions in local business groups.
- **Pilot client audit** — baseline review of the client's current pages, content and results.

## 3.4 Functional Requirements

Priority: M = Must have · S = Should have · C = Could have (MoSCoW)

| ID | Requirement — the agency / its digital assets shall... | Priority |
|---|---|---|
| **A. Services & packages** | | |
| FR-01 | Offer three service packages (Starter, Growth, Pro) with clearly defined deliverables and monthly pricing. | M |
| FR-02 | Provide a free initial audit of a prospect's social pages as a lead magnet. | S |
| FR-03 | Produce a monthly content calendar per client for approval before publishing. | M |
| FR-04 | Plan, launch and optimize paid campaigns on Meta and TikTok with defined objectives and budgets. | M |
| FR-05 | Set up and optimize Google Business Profile and basic local SEO for clients. | S |
| **B. Website / landing page** | | |
| FR-06 | Present the agency's value proposition, services, packages, case studies and contact options in Arabic and English. | M |
| FR-07 | Capture leads via a short form (name, business type, phone, interest) and a WhatsApp click-to-chat button. | M |
| FR-08 | Track page views, form submissions and WhatsApp clicks as conversion events (GA4 + Meta Pixel). | M |
| FR-09 | Allow prospects to book a discovery call through a scheduling link. | C |
| **C. Social channels & content** | | |
| FR-10 | Maintain active Facebook, Instagram and TikTok accounts with a consistent posting schedule (≥ 4 posts/week). | M |
| FR-11 | Publish a balanced content mix: educational, social proof, behind-the-scenes and offers. | M |
| FR-12 | Respond to comments and messages using approved response templates. | M |
| **D. Lead management & reporting** | | |
| FR-13 | Record every lead in a CRM tracker with source, status and follow-up date. | M |
| FR-14 | Provide a KPI dashboard (reach, engagement, traffic, leads, CPL) updated weekly. | M |
| FR-15 | Deliver a monthly client report in plain language with results and next actions. | M |
| FR-16 | Use a standard UTM naming convention for all campaign links. | S |

## 3.5 Non-Functional (Quality) Requirements

| ID | Category | Requirement |
|---|---|---|
| NFR-01 | Performance | Landing page loads in under 3 seconds on a 4G mobile connection; images compressed and optimized. |
| NFR-02 | Responsiveness | All web pages are mobile-first and render correctly on common phone screen sizes. |
| NFR-03 | Service level | Leads receive a first response within 1 working hour; client approvals turned around within 48 hours. |
| NFR-04 | Security | Two-factor authentication on all business and ad accounts; role-based access through Business Manager; no shared passwords. |
| NFR-05 | Privacy & compliance | Lead forms show a consent notice; personal data is minimal and access-restricted, in line with Egypt's Personal Data Protection Law No. 151/2020; ads follow platform policies. |
| NFR-06 | Usability | Reports are understandable by a non-marketer in under 5 minutes; Arabic RTL layout is correct. |
| NFR-07 | Brand consistency | All outputs follow the brand guidelines (logo use, colors, fonts, tone of voice). |
| NFR-08 | Accessibility | Sufficient color contrast, alt text on web images and captions on videos. |
| NFR-09 | Reliability of data | Tracking events verified before launch; weekly data-quality check against ad platform figures. |
| NFR-10 | Scalability | Templates and processes allow onboarding a new client within 3 working days. |

## 3.6 User Stories

| ID | User story | Acceptance criteria |
|---|---|---|
| US-01 | As an **SME owner**, I want to compare packages and prices on one page so that I can choose what fits my budget. | Packages shown side by side with deliverables and price; visible on mobile without zooming. |
| US-02 | As an **SME owner**, I want to contact the agency on WhatsApp in one tap so that I can ask questions quickly. | WhatsApp button on every page; message pre-filled; click tracked as an event. |
| US-03 | As a **prospect**, I want a free audit of my page so that I understand what to improve before paying. | Audit request form; audit delivered within 3 working days using a standard template. |
| US-04 | As a **client**, I want to approve the content calendar before publishing so that content matches my business. | Calendar shared by day 25 of the prior month; approval or comments logged. |
| US-05 | As a **client**, I want a simple monthly report so that I know what my money achieved. | One-page summary: reach, messages/leads, cost per lead, top content, next actions. |
| US-06 | As a **performance marketer**, I want consistent UTMs so that I can attribute leads to the right campaign. | All links follow the UTM convention; GA4 shows source/medium/campaign correctly. |
| US-07 | As the **project manager**, I want every lead logged with a status so that no enquiry is lost. | 100% of leads in the CRM within 24 hours; status updated after each contact. |
| US-08 | As an **end customer** of a client, I want quick replies to my questions so that I can decide to buy. | Median response time ≤ 1 working hour, measured weekly. |

## 3.7 Constraints & Assumptions

### Constraints

- Fixed project window aligned with DEPI deadlines.
- Limited paid-media test budget (estimated EGP 5,000–8,000 across the launch and pilot).
- Team members work part-time alongside training and other commitments.
- Only free or low-cost tools are used.
- Platform policies (Meta, TikTok) restrict certain claims and categories.

### Assumptions

- The pilot client provides page access and timely approvals.
- Ad accounts are approved and remain in good standing.
- Survey and interview participants are reachable through local business networks.
- Platform audience data remains broadly stable during the project.
- Each member commits about 10–12 hours per week.
